## Check valves

The Wennstrom check valves are mechanical devices that only allow liquid fuels to pass through in one direction. There are two basic types, straight or angled, in an adjustable or a non-adjustable version of varying dimensions. The check valves are adjustable between 0,3 – 0,7bar.

Our 1½ check valve allows a flow rate of 390l/min at 0,3bar suction and the 2" check valve allows 540l/min.

For use at airports there is a chemically nickel-plated adjustable version available as 1½" or 2".

| Versions of check valves                     | Item no. |
|--|----------|
| Check valve 90° G1½"                         | 220-01   |
| Check valve 90° G2"                          | 220-02   |
| Check valve 90° G1½" adjustable              | 220-3    |
| Check valve 90° G1½" adjustable for aviation | 220-3E   |
| Check valve 90° G1½" adjustable spring kit   | 220-4    |
| Check valve 90° G2" adjustable               | 220-5    |
| Check valve 90° G2" adjustable for aviation  | 220-5E   |
| Check valve straight G1½"                    | 235-01   |
| Check valve straight G1½" adjustable         | 235-3    |
| Check valve straight G2" adjustable          | 235-5    |
