## Safelock

Safelock is an alternative to Outlock. It fits snugly over the dip tube opening and when the padlock is in place, Safelock cannot be taken off without much less than a metal saw! Unless you have the key of course which allows quick and easy access.

The cap is made of robust brass, thick enough to withstand a clean blow. The product is easy to handle even with gloves and the recommended padlock large and deterring!

Versions of of the Safelock	Item no.
Safelock for filling elbow (G2)	ES1060AQ
Safelock for dip tube (G2)	ES1060AQL
Safelock W2"x7 lockable cap	10-50
